

ModusLink Rebate

New Opportunities for Reward

ModusLink Rebate is a web-based customer loyalty solution designed to stimulate sales and increase the profitability and value of rebate programs. Unlike traditional “mail-in only” programs, which typically have lengthy processing times or remain unclaimed by jaded customers, ModusLink Rebate expedites fulfillment and automates the complete redemption process — from validation and financial reconciliation to fulfillment and tracking — in as little as four days.

Benefits of an integrated ModusLink Rebate Solution:

- Stronger sales and revenue potential
- Reduced program, administrative management and operating costs
- Improved customer participation and relationship building
- Greater visibility and reporting across programs and processes

Streamlining execution will increase participation and satisfaction, providing clients with a solid foundation for developing stronger relationships and sales opportunities with customers.

In addition to multilingual website development and hosting, our solution provides a complete range of customer support, financial and account management services, including full support for rebate program design and implementation. With seamless integration of ERP/POS systems and multichannel supply chain operations, we can offer greater visibility and analysis across the entire program value chain, while significantly reducing administrative management and operating costs.

The result is a program that is rewarding for both clients and their customers.

Rebate Management One-Stop Shop
